THESIS CORRECTION EFORM
APPROVALS WORKFLOW

Version 1.0
5 October 2018
1 eForm Approvals Workflow

The diagram illustrates the workflow for Thesis Correction Approvals. It begins with a candidate re-submitting their thesis, followed by a delegated authority recommending the outcome. The associate dean then makes a final decision, and EGAP advises the candidate and updates the SAS. The library processes the thesis, and the candidate is notified if the award is granted or not. Additional emails are sent to various stakeholders throughout the process.
