Dear Douglas,

As a self-insurer, we can offer an alternative to the traditional insurer approach. Our approach is based on the University’s own resources. We take the perspective of a self-insurer to ensure that the University’s insurance needs are met in the most appropriate and cost-effective manner. Our approach is designed to ensure that the University’s innovative and dynamic nature is reflected in the insurance policies.

We work closely with the University’s risk management team to identify and mitigate risks. Our approach is guided by the University’s values and objectives, ensuring that our policies align with the University’s strategic priorities.

As a self-insurer, we have the flexibility to tailor our insurance policies to meet the University’s specific needs. We can create policies that are bespoke to the University’s operations and risks.

We offer a range of insurance policies, including:
- Property insurance
- Liability insurance
- Accident and health insurance
- Motor insurance

Our policies are designed to provide comprehensive coverage for the University’s assets and operations. We can provide bespoke policies that meet the University’s requirements.

We offer competitive premiums, ensuring that our approach is cost-effective for the University.

We are committed to providing exceptional service to the University. Our team of experts is available to answer any questions and provide support throughout the insurance process.

We look forward to the opportunity to work with the University to develop a bespoke insurance solution that meets the University’s needs. Please contact us to discuss our approach further.

Sincerely,

Aside from the October email I have seen no posters or television advertising for the University. The current self-insurance procedure to address how staff, students and visitors interact on a day-to-day basis. With the campus environment constantly changing the procedures are subject to continuous improvement in order to mature the safety culture at the University.

1. The driving pattern of drivers using the Baldessin Parking station - driving in and out of the main drives. Drivers exceed the sign-posted 40kph speed limit on campus - this regulation is not enforced. Drivers using mobile phones while driving on campus - this regulation is not enforced. Drivers exceeding the sign-posted 40kph speed limit on campus - this regulation is not enforced. Where to ride bicycles in the Union Court area. I realise that this area is not incorporated into the eventual decision to apply for a licence. Thank you for your comments and for the feedback button, dedicated and monitored email address to receive questions and feedback, ANU TV screens/posters for information boards in local work areas and; article(s) published in the University and WHS publications.

2. It is said that ‘Comcare discretion’ and ANU’s ‘ability set points’ differs in future, between ‘Comcare discretion’ and ANU’s ‘ability set points’. The greatest differences to staff from moving to a self-insurance model have been the introduction of the new self-insurance scheme, which results in a reduction in the number of paid claims on an annual basis. The University is expected to reduce the number of paid claims on an annual basis. The University is expected to reduce the number of paid claims on an annual basis.

3. Future Cost As a result of the above improvements made to WHS systems and the associated increase of prevention and protection activities, the University predicts a $2.7 million reduction in self-insurance claims. In the event of an additional 10% self-insurance claim, the University would likely exceed $9.3 million annually, at least triple the projected self-insurance costs. In fact, current WHS claims have dropped significantly. Lower annual claims numbers does not reduce the premium costs to Comcare. Consultants to a new ways, designed to help staff work together to support and provide efficient and effective systems for feedback and comments. The University is currently in works consultation and four already merged stakeholders groups appraising the proposed change, including: the ANU College of Law, Justice Environment College of Medicine, Biology & Health, School of Medical Research and Economics, Research Operations, Human Resources Management, and Facilities & Services.

4. Under the current scheme, but would reduce compensation costs for the University under self-insurance. In fact, current WHS claims have dropped significantly. Lower annual claims numbers does not reduce the premium costs to Comcare. Consultants to a new ways, designed to help staff work together to support and provide efficient and effective systems for feedback and comments. The University is currently in works consultation and four already merged stakeholders groups appraising the proposed change, including: the ANU College of Law, Justice Environment College of Medicine, Biology & Health, School of Medical Research and Economics, Research Operations, Human Resources Management, and Facilities & Services.

5. The ANU College of Law, Justice Environment College of Medicine, Biology & Health, School of Medical Research and Economics, Research Operations, Human Resources Management, and Facilities & Services.

6. In my opinion, the current and proposed changes is a good move for the University and the community. The University is currently in works consultation and four already merged stakeholders groups appraising the proposed change, including: the ANU College of Law, Justice Environment College of Medicine, Biology & Health, School of Medical Research and Economics, Research Operations, Human Resources Management, and Facilities & Services.

Dear Michael,

Thank you for your feedback and the time taken to voice your concerns as to whether self-insurance would be better suited to the scenarios at the ANU. Your comments have been noted and added to the consultation log and passed on for further consideration.

In response to the unions position on self-insurance, the University has an open and transparent approach with unions and staff who have already provided feedback. There were some questions raised with me (in my capacity as Council member). The individual, who is responsible for the presentation of the self-insurance proposal, has been encouraged to provide feedback and ask questions about the process. The presentation was well attended and there were a lot of good questions that need to be considered to ensure that the process is clear and transparent.

In the previous section, the University’s response was outlined to the unions’ concerns about the implementation of the self-insurance scheme. The concerns were discussed and a broader range of options was presented. The feedback was taken on board and the self-insurance scheme has been amended to address some of the concerns raised.

The next section of the presentation will outline the proposed benefits and the process for implementation. The benefits will include increased flexibility, greater control over the provision of services, and improved outcomes for staff. The process for implementation will be outlined, including the consultation process and the timeline for implementation.

In the final section, the University will demonstrate its commitment to ensuring the safety and wellbeing of all staff. The University’s commitment to the health and safety of all staff will be demonstrated through the implementation of the self-insurance scheme and the provision of support and resources.

Thank you for your continued support and engagement in the self-insurance consultation process.

Yours sincerely,
