

Digital Master Plan – Document Map

Digital has evolved from just an enabler to a strategic business capability with the ultimate goals of our **Digital Master Plan** being to deliver to the four key strategic pillars of the **ANU 2025 Strategy**:

1. Renew our national mission and meet our responsibilities to Australia;
2. Deliver a student experience equal to the world's best;
3. Conduct research that transforms society and creates national capability; and
4. Be an equitable and inclusive University of choice.

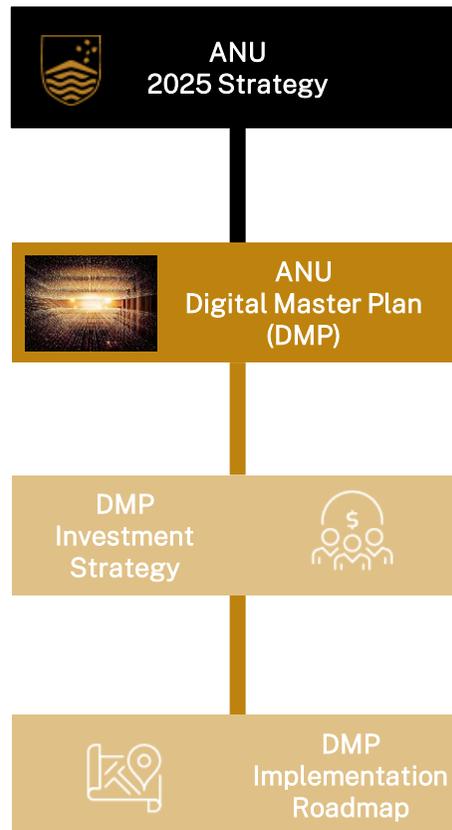

The **Digital Master Plan** reflects our current state, our community's view of our desired digital future and outlines four aspirations for our digital environment:

1. A stable digital foundation;
2. A personalised experience;
3. Connected environments; and
4. Data-driven insight and decision-making.

High level representation of agreed prioritised programs of work to deliver the four aspirations of the **Digital Master Plan** with the aim of focussing resources and energy to deliver significant change.

Outline of the initiatives that will transform our digital environment and deliver the four aspirations of the **Digital Master Plan** in three phases:

1. Stabilise and Prepare (2021-2022);
2. Transform (2023-2025); and
3. Accelerate (2026-2030).

Reference Documents – Informing the DMP Suite

Art of the Possible Group Personas

"The Art of the Possible" workshops provided invaluable insight into the desired future state of the University's digital environment.

Application and Data Roadmap

The initiatives are a representation of the activity required to move our applications & data from the current to future state. Sequencing is illustrative only with in-domain prioritisation.

Infrastructure Roadmap

The initiatives are a representation of the activity required to move our technology and infrastructure components from the current to future state.

TECHNOLOGY GOVERNANCE FRAMEWORK

The Technology Governance Framework consists of four committees that operate in a complimentary manner to ensure that digital and information and communication technology investments achieve the aspirations of the University's **Digital Master Plan**: Digital and Data Strategy Committee (DDSC), Data Working Group (DWG), Technology Investment Committee (TIC) and Solution Design Authority (SDA).
