Press advertising describes job advertisements in a printed medium such as newspapers, magazines and journals. We currently primarily advertised our jobs advertisements in the Saturday Canberra Times and the Wednesday Higher Education Supplement (HES) in the Australian. Advertising in the mainstream press can often be quite expensive and recruitment trends have shown that more and more candidates are now using online advertising job boards as a primary job search tool. When advertising a vacancy you will need to consider if this method of advertising is the best way to reach your target audience.

In choosing your advertisement location you will also need to determine if you would like the advertisement to be part of an ANU composite, which significantly reduces the costs, or as a separate standalone. (Please note that all standalone advertisements will need approval from the Human Resource Director prior to placement).

Please find below examples of our current advertising templates and some example costings:
