Guide to using Turnitin for Apple iPad and Wattle

Lecturers at the ANU are invited to use the Turnitin app via their Apple iPad devices, which is fully integrated into the Turnitin functions within the ANU Wattle learning management system. With Turnitin for iPad you will be able to:

- View student work that has been submitted to Turnitin assignments via Wattle
- Add QuickMark comments to student submissions
- Mark submissions using rubrics that have been previously attached to assignments
- Leave Voice Comments on submissions
- Leave general comments on submissions
- Add and change grades for submissions (with results dynamically updated in Wattle)
- See the Originality Report content match overview list of sources for submissions

Note that class management, assignment management, and submissions must be performed through Turnitin within Wattle.

Where do I access Turnitin for iPad?

You can download the app via the App Store (search for Turnitin) or visit https://itunes.apple.com/us/app/turnitin/id657602524

How do I generate a ‘class access code’?

As Wattle user, you will need a unique ‘class access code’ in order to log in to your classes on Turnitin for iPad. To generate a unique class access code:

1. From your computer, sign into Wattle
2. Open the document viewer for a paper in the course
3. Click on the iPad access button in the lower left
4. Click “Generate code”
5. The unique class access code will be displayed
6. Tap the “Access Code” button on the Turnitin for iPad app login screen
7. Type in the class access code you have generated
8. Tap “Add”
How do I add access codes for the my other course in Wattle?

Wattle course will have its own class access code. To access additional Wattle classes from Turnitin for iPad:

1. Generate the class’s unique access code from Turnitin within Wattle
2. Open Turnitin for iPad
3. Tap the user profile button in the upper right
4. Tap “Add class with access code”
5. Enter the access code for the class
6. Tap “Add”
7. Repeat for remaining courses

Why don’t I see the marks that I left using my computer?

If you don’t see your grading marks when you view the student's work in Turnitin for iPad, or you don’t see the marks you have left on the iPad when you view the student’s work to grade, your iPad may not have synched. To tell Turnitin for iPad to sync:

1. Check to be certain that your iPad is online
2. Open Turnitin for iPad
3. Click the Sync button at the top right (arrow in a circle)

This should cause your student submissions to sync. If a number appears in a red block next to the sync button, click on the block to see what errors may have occurred.

How do I logout of Turnitin for iPad?

To log out of Turnitin for iPad:

1. Navigate to the assignment inbox screen in Turnitin for iPad (the button in the upper left will say “Assignments”)
2. Tap on the user profile button in the upper right (it will look like the outline of a head)
3. Tap the “Unlink iPad from Turnitin” button
